

Stardome Information

The StarDome is a portable, inflatable planetarium, which fits into most school halls or gyms. It is 6 metres in diameter, approximately 4 metres high and with capacity inside for about 30 children or 25 adults. The StarDome **cannot** be set up outdoors.

We offer 2 different programme schedules:

1. Four **50 minute** sessions per day
2. Six **30 minute** sessions per day.

During a **30 minute** session the presenter will guide the participants through a tour of the night sky. This will include the highlighting of seasonal constellations and the cultural impact that they had.

During a **50 minute** session the presenter will lead a curriculum focused workshop covering a specific topic area. They will also include a short tour of the night sky to allow participants to experience the stars.

See below for example timetables for your day.

Show	Start	Finish	Year Group	Programme
SET-UP	9:30	10:00	SET-UP
