

## Find the Planets gallery

When Astronaut George goes into space, just like a scientist he wants to find out more about each of the planets.

Put on our scientists jacket and use the magnifying glasses to explore the planets gallery.

**How many planets are there?**

**What colour is Neptune?**

**At the end of the gallery find the meteorite samples using the magnet which one is magnetic?**

## Astronaut George Trail

Astronaut George is travelling around our Solar System looking for samples that he can bring home, but he has run out of magic words to get his rocket to work...

**Can you help Astronaut George get home safely?**

Using our trail, look around the galleries to help you train to become a great astronaut just like George, complete questions and find out more about space.

Try the space costumes in each of the galleries but please put them back on the rails before you make your way to the next gallery.

## Find the Orbiting Earth Gallery

Find the giant Earth. When Astronaut George is in space he can see a view of the Earth looks a little like this.

### What shape is the Earth?

This is the same shape as the Moon and the stars in space.

From the Earth, Astronaut George can see many stars in space, they make him want to explore.

Why not try out the costumes and shine like a star?

## Find the Into Space Gallery

Look at the space suits in this gallery.

These are what astronauts wear when they are in space; they help to protect them on their journey.

Can you find the astronaut dressing up box?  
Can you dress like an astronaut?

Imagine putting on big boots over the top of your suit and thick gloves as well.

Now with your adult, sit in the Columbus module and imagine you are on a trip up into space just like Astronaut George. You will need to count down to get the rocket to work, are you ready? 5...4...3...2...1

Can you find this?

What is it?

Draw the earth here

## Find the astronaut glove box

(it is opposite the object in the picture)

Put your hands in the gloves and try to put the blocks together.

## Find the Exploring the Universe gallery

Astronaut George has travelled to many amazing places in space where there are many different types and colours of stars.

Try our black hole and imagine travelling through space

## Can you find our stardust wall, what objects can you spot?

Travelling around these stars could be planets like our Earth and maybe on one there might even be aliens.

Try our dressing up box to dress up like an alien.

Draw your alien here

## What kind of alien are you?
